FIRST Robotics Visits the Statehouse
Indiana FIRST Group Demonstrates Competition Robots

Seven Indiana FIRST Robotics teams visited the Indiana Statehouse on March 7, 2006. This was a great opportunity for all of the teams in the state to showcase their machines and team members to their local legislators and to spread awareness of the FIRST mission. The teams were visited by Governor Daniels and Dr. Sue Ellen Reed, Superintendent of Public Instruction. They both took some time to talk to the teams and pose for some photographs.
